SUBJECT

Hangar Curtains for []

ACTION REQUIRED - REFERENCES

ATTENTION: []

1. During recent operations at [] the hangar curtains provided by [] proved inadequate. This failure can be directly attributed to (a) cables and turn-buckles were made of galvanized iron and not steel (b) curtain material was of a poor quality canvas (c) curtain eyelets were not adequately reinforced.

25X1A

2. The attached drawings are forwarded for your use in making up specifications for their manufacture in []

25X1A

3. FYI: Curtains are fastened to cables at top and bottom by "U" bolts and laced along their common sides by jute rope.

4. Present plans call for the erection of a 15ft brick wall at the rear of the hangar, which will provide some relief from the wind.
